Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 May 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 29 May 2007 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 14,15,17,18,22 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by De Santis (US 5,560,373).

De Santis teaches a drill bit with a shaft (12), a lumen (13), and a notch (46). Fig 7. The shaft is disposed in the hub (Fig 1).

4. Claims 14,15,17, and 19-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Shaw (US 5,261,818).

Shaw teaches a shaft (13) with a cutting surface (14), a lumen (18), with second openings (22) and an open notch (26). Shaw also teaches a method of drilling through bone and injecting a substance through needle (Summary of the invention).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over DeSantis.

DeSantis teaches the device as above but does not specify the distance of the distal tip to the proximal end of the notch. At the time the invention was made, it would have been an obvious matter of design choice to a person of ordinary skill in the art to space the notch of DeSantis 0.10-0.125 inches because Applicant has not disclosed that specific distance provides an advantage, is used for a particular purpose, or solves a stated problem.

Therefore, it would have been prima facie obvious to modify DeSantis to obtain the invention as specified in claim 16 because such a modification would have been considered a mere design consideration which fails to patentably distinguish over the prior art of DeSantis.

7. Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Shaw. Shaw teaches the device as above but does not specify the distance of the distal tip to the proximal end of the notch. At the time the invention was made, it would have been an obvious matter of design choice to a person of ordinary skill in the art to space the notch of Shaw 0.10-0.125 inches because Applicant has not disclosed that specific

distance provides an advantage, is used for a particular purpose, or solves a stated problem.

Therefore, it would have been prima facie obvious to modify Shaw to obtain the invention as specified in claim 16 because such a modification would have been considered a mere design consideration which fails to patentably distinguish over the prior art of Shaw.

Response to Arguments

8. Applicant's arguments with respect to claims 14-23 have been considered but are moot in view of the new ground(s) of rejection.
